Qualification of OS Updates - Ensuring Reliable Performance on Pro-face Devices

At Pro-face, we understand the importance of keeping your industrial devices up-to-date with the latest software updates and security patches.
However, not all updates are created equal, and some may cause compatibility issues or other problems that can impact device performance and uptime.

Our team of experts performs a series of tests on each update, including compatibility testing, functional testing, to ensure that it meets our standards for reliability, performance and security.
