- Ukraine
- Venezuela
- Yemen

#### **Restricted Countries as defined by Schneider Electric:**

**A Tier 1 Country** refers to a country which is **under general embargo** where sanctions apply at the country level (or concerned regions) by one or more countries (e.g., U.S.).

**A Tier 2 Country** refers to a country which is not totally under embargo, but where the sanctions are linked to specific individuals or entities (blacklisted), sectors, or geographical areas.

**Note:** For any other country not on this list, we remind you that Export Control Due diligence assessment must be performed, and End Use Statement is required if products are dual-use items or if end-use is sensitive.
