Preface

This guidebook introduces the procedures to replace a unit from “GP4000 Series W Model” to “ST6000 Series (ST-6300T / 6500T)”. The recommended substitute models are as follows.

| Model in use | | Recommended substitutes | |
|--------------|---------------|-------------------------|---------------|
| GP-4301TW | PFXGP4301TADW | ST-6300T (GP-Pro EX) | PFXST6300TADE |
| GP-4501TW | PFXGP4501TADW | ST-6500T (GP-Pro EX) | PFXST6500TADE |

Safety Information

HAZARD OF OPERATOR INJURY, OR UNINTENDED EQUIPMENT DAMAGE

- Before operating any of these products, be sure to read all related manuals thoroughly.
- Be sure to do installation, connection, and maintenance by a person who is familiar with the construction method of electrical equipment, related laws and regulations, and has appropriate technology.

We shall not be liable for any serious injury to human life, damage to equipment, or any other consequences if used without observing these.

Summary

The replacement from GP4000 series W Model to ST-6300T / 6500T generally keeps compatibility, but the following is the main point to note.

- Display resolution: ST6000 series have a better resolution so it's necessary to convert resolution by the software to use old project data from GP4000 series W model. For more details, please refer to Chapter1 from software replacement procedure "Replacement Guidebook (Software)_EN. pdf" included in the zip file.

About the installation method

GP4000 W Model

Insert the installation fasteners into HMI's insertion slots on the top and bottom sides. Slide the fasteners to the back.

Use a Phillips screwdriver to tighten each fastener screw. The necessary torque is 0.5 N•m (4.4 lb-in).

ST-6300T / ST-6500T

Insert the installation fastener hooks into the insertion slots of this product.

In a clockwise direction, tighten the installation fastener's screws with a screwdriver. The necessary torque is 0.5 N•m (4.4 lb-in).

Please check [ST6000 Series Hardware Manual](#) for installation requirements and procedure.

6. About Resolutions

When replacing with a model with a different resolution, Convert the resolution with the following settings.

With GP-Pro EX

The display unit can be changed on the “Project” → “System Settings” → ‘Change Display Unit’ screen of GP-Pro EX.

If you check on [Convert Resolution] when changing the Display Unit type (as shown below), you can adjust both size and location of the part and the text relative to the display resolution automatically. But still, you may need to adjust them manually. Especially, if using Standard font for the font type, after resolution converter, the size will get smaller. In that case, you can improve by using Stroke font or Image font.

7. Other Important notes

- Do not expose the hardware to direct sunlight. Recommend to use the option item “UV Protection Sheet” to protect the display from ultraviolet light.
- Do not use the hardware outdoors.
- Do not turn on the hardware if condensation has occurred inside the device.
- The panel brightness may decrease when used for a long time in an environment continuously filled with inert gas. Please ventilate the control panel periodically.
