

Xycom Automation, Inc. is a subsidiary of Pro-face America, Inc.

OpenHMI™ WW Operator Interface Products

DS-350055(K)

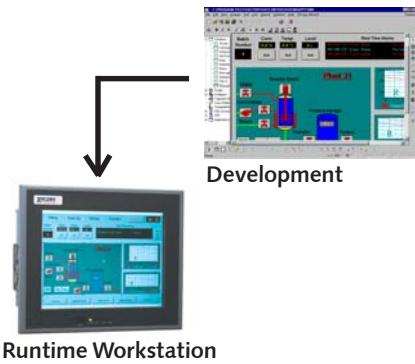

Xycom Automation revolutionizes the operator interface market by offering out-of-the-box, preconfigured, pretested solutions. OpenHMI™ WW operator interface products combine the best industrial PCs with a full-featured Human-Machine Interface (HMI) software package that can be used for applications ranging from simple operator input device replacement to supervisory control and data acquisition (SCADA) applications.

Now OEMs, systems integrators, and end-users can reduce the development time and costs of high-end operator interface solutions with an integrated solution.

OpenHMI WW software is powered by Wonderware® and consists of two components: the OpenHMI WW development software (OpenHMI WW Configurator) and the OpenHMI WW runtime workstation. The user develops the HMI application on a desktop, laptop, or industrial PC with the OpenHMI WW Configurator, and then transfers the completed application to the OpenHMI WW runtime workstation. The OpenHMI WW runtime software is preloaded on

- the OpenHMI WW runtime workstation.
- Xycom Automation offers four runtime workstation variations. There are two OS options, Windows® 2000 and Windows® SP, and two different tag limits: 500 tags and 1000 tags. OpenHMI WW workstations are available with 8.4", 10.4", 12.1", and 15" LCD displays. NEMA sealed front panel options include keypad, touchscreen, integrated industrial mouse, and combinations of these features.

- FEATURES**
- Microsoft® Windows®-based development and runtime software
 - 8.4" to 15" color flat panel display
 - Operator input through a combination of integrated touchscreen, keypad, and/or mouse
 - Built-in 10Base-T/100Base-TX Ethernet
 - A wide range of drivers and I/O servers for the most popular control devices
 - Optional industrial communication network interface
 - Intel® Celeron™ or Pentium® III CPU up to up to 1.26 GHz
 - PC/104 expansion (3300 series only); ISA and/or PCI expansion (3600 series, 3700 series; 31xxTs)
 - Graphic operator instruments
 - Alarming
 - Real-Time Trending
 - Recipes
 - OPC client support (optional)
 - NEMA 4/4X/12 front panel
 - UL listed for Hazardous Locations: Class I, Division 2, Groups A, B, C, D; Class II, Division 2, Groups F and G

OPENHMI WW HMI BENEFITS

Get Exactly What You Need

OpenHMI WW Industrial PCs offer a scalable hardware and software solution. From the operating system to the display size and expansion options, you can select a cost-effective Industrial PC scaled to application specific requirements.

Get Started Quickly

Configuration wizards, convenient tools, and preloaded software make OpenHMI applications easy to build and the Industrial PC is practically ready to run right out of the box.

Reuse Your Application

Graphic panels and scripting developed for an application for one plant floor network will run on Industrial PCs connected to many different networks. You aren't limited to a single proprietary network.

Depend on It

Xycom Automation leads the industry in reliability, service, and support with an optional five year warranty unmatched in the industry.

Talk to Anything, Anywhere

The broadest support for industrial networks allows simultaneous connections to nearly any set of devices. Through Microsoft and other enabling technologies, you can communicate with Ethernet connected products and databases. Exchange plant floor data with office applications and see what's happening from the plant floor to corporate headquarters.

MORE WITH OPENHMI WW

OpenHMI WW industrial PC runtime workstations include all the features of a basic operator interface, plus more advanced functionality not found in competitive products.

Most Other Operator Interfaces

- Create panels with proprietary software
- Connect to a single PLC network and one serial printer
- Character-based graphic and text displays
- Limited hardware options

Our OpenHMI WW Runtime Interface

- Powered by industrial HMI software
- Connect to different PLCs and industrial networks
- Communicate with Ethernet-connected databases, networks, and devices
- Fully animated, high-resolution graphics
- Full range of display, expansion, and operator input options

Leave Your Options Open

You can add functionality to your HMI application through standard PC technologies. OpenHMI Industrial PCs make it easy for end users and vendors to use off-the-shelf hardware and software, including programming tools, for application specific requirements.

Outstanding Value

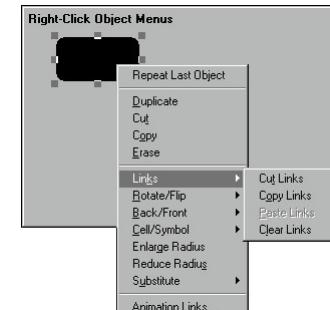

Wonderware HMI software is one of the most widely used open architecture HM/SCADA software packages, with a proven track record worldwide. OpenHMI WW brings most of that functionality to you at an incredible price. The features it cannot support include Quick Functions, Historical Trending and Logging, Indirect

Addressing, Alarm Logging, Remote Referencing, Supertags, SQL, SPC, and Local Variables in Scripts.

OPENHMI WW HMI CAPABILITIES AND FEATURES

Graphic Interface and Object Oriented Database

- Windows interface, including toolbars, fill-in-the-blank dialogs, pull-down menus
- Wizards to add predefined instruments, symbols, and other graphics
- Graphic operator instruments, including pushbuttons, meters, sliders, switches, text and numeric displays, LED-style indicators
- Fully animated, high-resolution graphics
- Multiple displays on one workstation
- Applications developed in one screen resolution can be converted to another
- Application Explorer

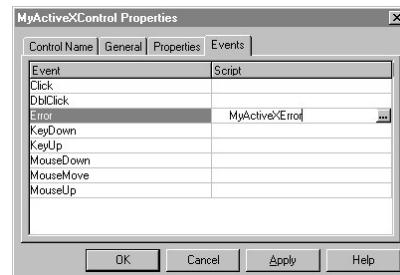

Open Architecture and Industry Standards

- Microsoft DDE communication to any Windows application that also supports DDE
- Can add third-party ActiveX controls
- Can import graphics in PC file formats
- Connect to other applications and networks

Trending

- Real-time trending

Alarms

- Alarm monitoring and reporting

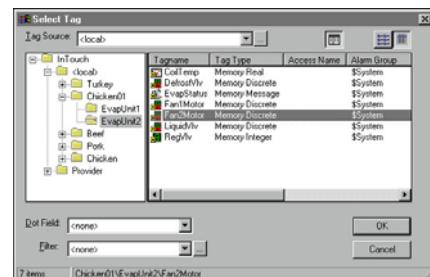

Recipes

- Recipe management to establish setpoints

Scripting

- Over 100 different functions
- Application, Window, Key, Condition, Data Change, Action Pushbutton, and ActiveX Event Scripts
- Event-driven triggering of actions in response to data changes, conditions, and user input

Security

- Password-protected runtime security

COMMUNICATIONS

OpenHMI WW supports communication with a variety of PLCs, networks, and other I/O devices. A partial list is given below; for a complete and up-to-date list, see www.xycom.com. OpenHMI WW also supports data transfer through NETDDE and OPC.

Device Drivers

- Allen-Bradley 1784-KT†, Ethernet Direct, Serial
- Allen-Bradley Data Highway Plus‡
- DeviceNet#
- GE Fanuc CCM2, GE Fanuc Genius† (Windows® 95 only), Host Communications (HCS)†, Series 90 SNP
- Interbus S#
- JBUS
- Mitsubishi A-Series
- Modicon Ethernet, MODBUS
- Modicon MODBUS Plus‡ (Windows NT® only)
- OMRON Host Link, SYSMAC NET†
- OPCLink Server§
- Profibus DP#
- Reliance AutoMate Serial, AutoMax PC Link†, R-Net Direct Link†
- Siemens/Texas Instruments 305/405 CCM, 405 MODBUS, 3964R, SIMATIC NET S7†, SIMATIC TI CVU TIWAY†, SIMATIC TI Direct, SIMATIC TI TIWAY†, SINEC H1† (Windows 95 only), SINEC H1 CP 1413†, SINEC L2 FDL†, SINEC L2 FDL A2†
- Square D SY/ENET (Windows NT® only), SY/LINK†, SY/MAX Point-to-Point
- S-S Technologies 5136-SD†
- Telemecanique Xway†
- Wonderware WWRSLinx (Windows NT® only)

ORDERING INFORMATION

Development Software and Other Software

At least one OpenHMI IWS Web Studio development software package is required to create applications for OpenHMI IWSCE or OpenHMI IWSNT workstations (hardware).

Order Number	Description
CONFIG-7.0	Configurator software for OpenHMI WW Windows NT and Windows 95 workstations, Version 7.0 one-year license and support. ¹
CONFIG-7.1 Version	Configurator software for OpenHMI WW Windows NT, 2000, and Windows 98 workstations, 7.1 one-year license and support.
AB-ENET-OPC2	Runtime license to use OPC server for Allen-Bradley Ethernet with OpenHMI WW workstation.

¹ Version 7.0 of the software is sold only for compatibility with version 7.0 software on previously sold OpenHMI WW runtime workstations. All new OpenHMI WW runtime workstations have version 7.1 of the OpenHMI WW runtime software.

Runtime Hardware

To create an order number, follow the conventions defined by the example order numbers and product configurations. All OpenHMI WW runtime workstations ship with version 7.1 of the OpenHMI WW runtime software.

Example Order Numbers

Order Number	Description
3310KP-HMI-300-128-98-WWA	OpenHMI WW 3310 workstation with 10.4" 640x480 (VGA) color display, reprogrammable keypad, NS Geode GX1 300MHz, 128 MB DRAM, AC power supply, no floppy drive, standard hard drive (20 GB minimum size), and OpenHMI WW 7.1 500 tag/50 window runtime software with Windows 98 operating system preloaded.
3612T-HMI-850-256-CDF-98-WWA	OpenHMI IWS 3612 industrial workstation with 12" 800x600 (SVGA) TFT color display, analog resistive touchscreen, Socket 370 Intel Celeron 850 MHz processor, 256 MB DRAM, 100/240 V AC power supply, standard hard drive (20 GB minimum), rear access floppy and CD-ROM drives, USB ports, 10/100 BaseT Ethernet, OpenHMI WW 500 tag/50 window Runtime software and Windows 98 operating system preloaded.
3615KPM-HMI-850-256-CDF-98-WWA	OpenHMI WW 3615 workstation with 15" 1024x768 (XGA) color display, reprogrammable keypad, built-in mouse, Socket 370 850 MHz Intel Celeron processor, 256 MB DRAM, AC power supply, floppy drive & CD-ROM drive, Ethernet, standard hard drive (20 GB minimum size), and OpenHMI WW 500 tag/50 window runtime software with Windows 98 operating system preloaded.
3715KPM-HMI-850-256-CDF-98-WWA	OpenHMI WW 3715 workstation with 15" 1024x768 (XGA) color display, reprogrammable keypad, built-in mouse, Socket 370 850 MHz Intel Celeron processor, 256 MB DRAM, AC power supply, floppy drive & CD-ROM drive, Ethernet, standard hard drive (20 GB minimum size), and OpenHMI WW 500 tag/50 window runtime software with Windows 98 operating system preloaded.
3115T-HMI-1200-256-2K-WWA	OpenHMI WW 3115T workstation with 15"(XGA) color display, analog resistive touchscreen, socket 370 1.2 GHz Celeron processor, 256 MB DRAM, AC power supply, CD-ROM and floppy drives, USB and Ethernet, standard hard drive (20 GB), and Open HMI WW 500 tag/50 window runtime software and Windows 2000 operating system preloaded.

ORDERING INFORMATION (HARDWARE CONTINUED)

OpenHMI WW 3300 Industrial Workstations

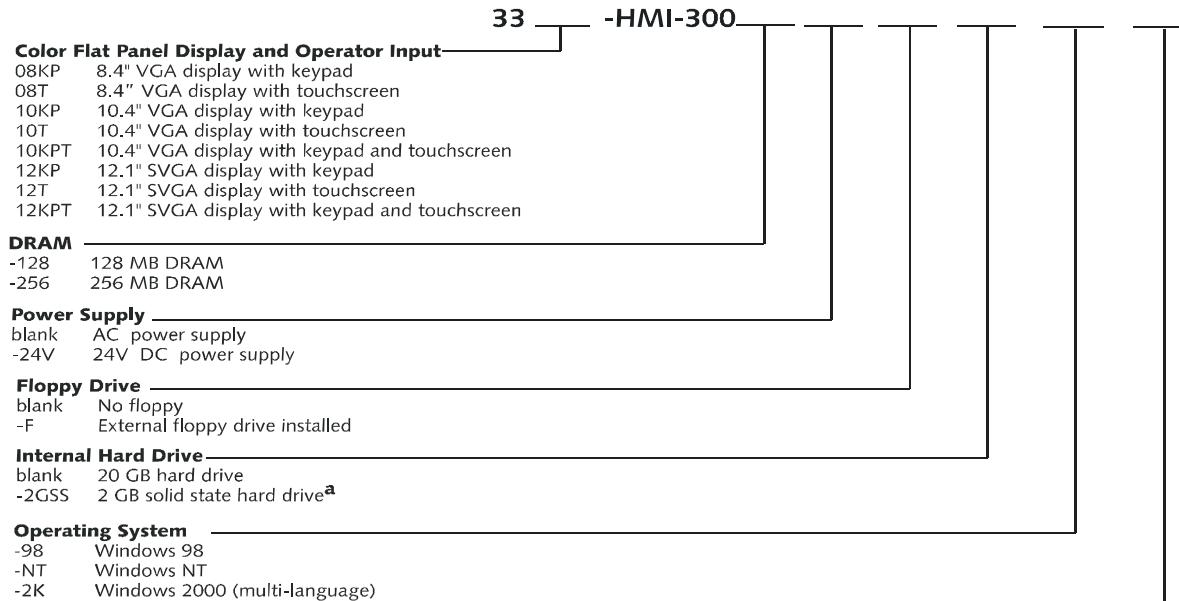

OpenHMI WW 3300 industrial workstations have a standard hard drive (20 GB minimum size).

Standard Configurations
