

# OPERATOR INTERFACE PRODUCTS APPLICATION NOTE

Subject: Animated Text for SSWIN

AN# 1074A

Date: January 22, 1998

Name: Shiu Moy

Page: 1 of 1

Description: The sample application displays different messages and blank spaces if no condition is true

Begin by creating an animated text object. Select *Shape Animations* then the *Text* tab. Assign the fields with tag names and the corresponding text message. The following example will illustrate the procedure.

<u>Tag Name</u>	<u>Message</u>
MSG1	This is message one
MSG2	This is message two
MSG3	This is message three
MSG4	(This will display blank spaces, if the previous conditions are not true)

From the **Data: Application: Expressions :**, assign the following expressions:

<u>Tag Name</u>	<u>Expression</u>
MSG1	ENTRY==1
MSG2	ENTRY==2
MSG3	ENTRY==3
MSG4	(ENTRY!=1)&&(ENTRY!=2)&&(ENTRY!=3)

For this example, ENTRY is a tag name for a data entry object, used for changing the text messages.
