Installation & Usage

Refer to the user guide included in 181226_DMT-DD_v2.05.zip.

Limitation

【For FP5000 series】

- Multi-touch is not available.
- Be sure to install the touch panel driver with the FP5000 connected. If the launcher has already been installed, an error message will appear; follow the message and restart the system.
- DMT-DD cannot be used in Extended Desktop mode.

【For SP5000 series (SP-5B41/SP-5B40)】

- Multi-touch is not available.
- Touch Panel Calibration cannot be performed from the launcher. If you need to calibrate, use the standard Windows touch panel driver. This limitation has already been fixed for SP-5B41. For SP-5B40, it will be improved by applying the update module (version 2.20 or later).

- Supported displays: SP-5700TP, SP-5660TP, SP-5600TP, SP-5500TP.
- DMT-DD cannot be used in Extended Desktop mode.
