GP6000 Series Advanced model

Big Screen Lineup

15”wide (Full HD)
PFXGP6740WCDI / PFXGP6740WCAI

19”wide (Full HD)
PFXGP6840WCDI / PFXGP6840WCAI

22”wide (Full HD)
PFXGP6940WCDI / PFXGP6940WCAI

Key segments & Process

Semiconductor
Front-end process
(Using Gas, Wet station, Water & Chemical)

Battery
Coating, Stacking, Winding

Machine Tools
Machining, Grinding, Automated cell

Water & Wastewater
Intank & pumping,filtration & Treatment

Packaging
High-speed line, multi station

Recycling
Sorting & conveying

Waste to energy plant
Plant Monitoring

Challenges

- High-density information doesn't fit on one screen.
- Too many details to display at once (flow chart, axis status, trends, etc.).
- Frequent screen switching delays decisions and actions.
- Comparing alarms and causes takes time, delaying recovery.

Large-Screen Solutions
for Operational Excellence

Standardized Monitoring

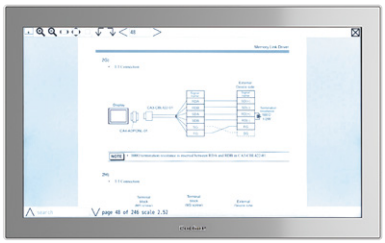

Single-Screen Dashboard

Consolidate alarm lists, trends, KPIs, and status on one screen to standardize monitoring. Small screens make screen crowded (with flow chart, axis, status etc.) and harder to read.

- Enhanced data visibility
- Early machine status detection
- Accelerated decision-making

Faster Recovery & Root-Cause Support

On-site Guidance

When responding to alarms, quickly access essential information—manuals, piping diagrams, inspection checklists, to support recovery efforts.
Use PDF Viewer to find the right procedure immediately.

- Immediate response and reduced MTTR (Mean Time to Recovery)
- Minimization of required multiple screen switch via the large screen

Error reduction & Streamlined Tuning

Alarms & Tuning on One Screen

Portrait mode keeps critical alarms visible while supporting machine tuning on the same screen. With flexible VESA mounting, one large HMI can replace multiple terminals.

- Faster response to critical alarms
- Reduced operational errors
- Lower installation costs
