EQUIPMENT:

Equipment and systems covered by this Certificate are as follows:

Graphic terminals type PFXSP...* or PFXFP...* and Accessories type PFXZC...* are user interfaces which include a touch-screen display, a box unit and printed circuit boards. All the display units are resistive touch panels except the display with capacitive touch panels (PFXSP5700WCD and PFXSP5800WCD products).

The graphic terminals are non-sparking during conditions of normal operation and are protected by protection modes Ex ec and Ex tc, except the resistive touch panels which are protected by Ex nC.

For a use in zone 2 for Gas application, the box unit shall be placed in an enclosure EPL Gc and the display unit onto an enclosure EPL Gc insuring a minimal ingress protection IP54.

For a use in zone 22 for Dust application, the box unit shall be placed in an enclosure EPL Dc and the display unit onto an enclosure EPL Dc insuring a minimal ingress protection IP6X.

The equipment is classified:

- Gc for Gas Group IIC and Temperature Class T6 or T4 for Gas application.
- Dc for Dust Group IIIC and Temperature Class T85°C or T135°C for Dust application.

SPECIFIC CONDITIONS OF USE: YES as shown below:

- Graphic terminals type PFXSP...* or PFXFP...* and accessories PFXZC...* shall be mounted in an additional enclosure EPL Gc insuring a minimal protection level IP54 for a Gas application, and in an enclosure EPL Dc insuring a minimal ingress protection IP6X for Dust application in accordance with the requirements of IEC 60079-0:2017, IEC 60079-7:2017, IEC 60079-15 :2017 and IEC 60079-31: 2013 standards. Graphic terminals shall be installed and used according with requirements indicated in the user manual.

- The enclosure equipped with Graphic terminals type PFXSP...* or PFXFP...* and accessories PFXZC...* shall not be opened when an explosive atmosphere is present and shall be used in an environment of not more than Pollution Degree 2 as defined in IEC60664-1.

- Graphic terminals type PFXSP...* or PFXFP...* and accessories PFXZC...* present a potential electrostatic charging hazard, safety precautions are defined in the instructions guide.

- Graphic terminals type PFXSP...* or PFXFP...* and accessories PFXZC...* shall be protected against UV light.

- The power supply cable, communication cables, USB or mini-USB connectors and RJ45 connectors must not be disconnected while circuit is live.

- User shall take into consideration during the installation of graphic terminals PFXSP...* or PFXFP...* and accessories PFXZC...*, that the product underwent only a shock corresponding to an energy of a low risk at 2J.

- The USB in front of the enclosure shall be hidden by screwing the USB cover PFXZCDCVUS1.

The other conditions are stipulated in the instructions guide
